Online P.O.S. ~Multi Outlet Solutions – Online POS Software~ Touch n POS & Smart POS Version

- Smart Online POS provide convenient, easy online software ideal for retailers & multi-outlets operators
- Non-web, no-ftp on die solution enable all outlets REAL TIME auto-sync data to HQ Server PC which is located at HQ premise itself, minimum hardware requirements

Affordable - One of the Most Valuable Online Solution

- Real-time business status will be reflected at HQ to Outlet, at every point of hours & minutes.
- Real time accurate data so you can monitor sales & inventory, cash count position at each store.
- Seamlessly & automatically consolidate individual stores data and gives you a centralized way of managing your chain better.
- Comprehensive & integrated modules, maturity in features & stable performance, console stores/branches data into one system, and then do an integrated analysis of sales, inventory and purchase.
- Allow HQ primarily focuses on managing your branch wide sales, purchase,, inventory, cash, expenses and profits.
- Easy to use & deploy, allow stores to concentrate on sales & customer service
- Centralized control: reduce staff cost, increase sales opportunity & reduce outlets errors & fraud

Efficiently reduce cost, increase return on investment

- Optimize inventory investment: Consolidated view of inventory facilitates optimum inventory & even inter-store transfer
- Increase your ROI: Effective stock purchase plan by identifying hot selling or non-moving stock across the chain.
- Best purchase: Combining this with the analysis of sales, purchase and inventory data, allows you to source products from the cheapest and best.
- Lower your pilferage: Real time stock audit & cash count can identify mismatch between physical stock & system stock early. Such continuous stock audits help lower pilferage.
- Lower operating cost: Optimal utilization of man power, optimal utilization of store space, effective inventory management etc leads to lower operating costs
- Centralized financial control: you get better financial control over your business, even for multi companies, multi stores.
- Fraud prevention: Real-time upload of POS data to the HQ prevents any tampering with data at the point of sale. This builds better awareness among point of sale staff and prevents fraud
- Price & promotion normalization: HQ can allocate pricing level, promotion gimmicks according to location or period via few clicks without requiring repetitive outlets efforts
