

EHUB PROFILE

Ehub was established and founded in early 2005 to carry on the business of provides all rounded services and solutions to support corporations in their Information Technology initiatives. Due to increasing demand of business software solutions in the Malaysian market nowadays, EHUB is going into the SME industry by diversifying its IT businesses and provide advanced software solutions that help to improve business performance.

Currently, the company is providing different types of hardware and software from most of the giant IT manufacturers. The range of IT products currently offered by the company are Server solutions (Microsoft Windows Server), Backup solutions (Backup Assists), Accounting & Inventory Control software, POS solutions, desktops, notebooks, printing devices and others. The company also providing consultation and yearly maintenance services for IT and POS solutions.

With the good reputation over the past, EHUB has been certified as Smart Implementer & Distribution Partner from Smart-Acc, A Pre-package Software developer at Malaysia.

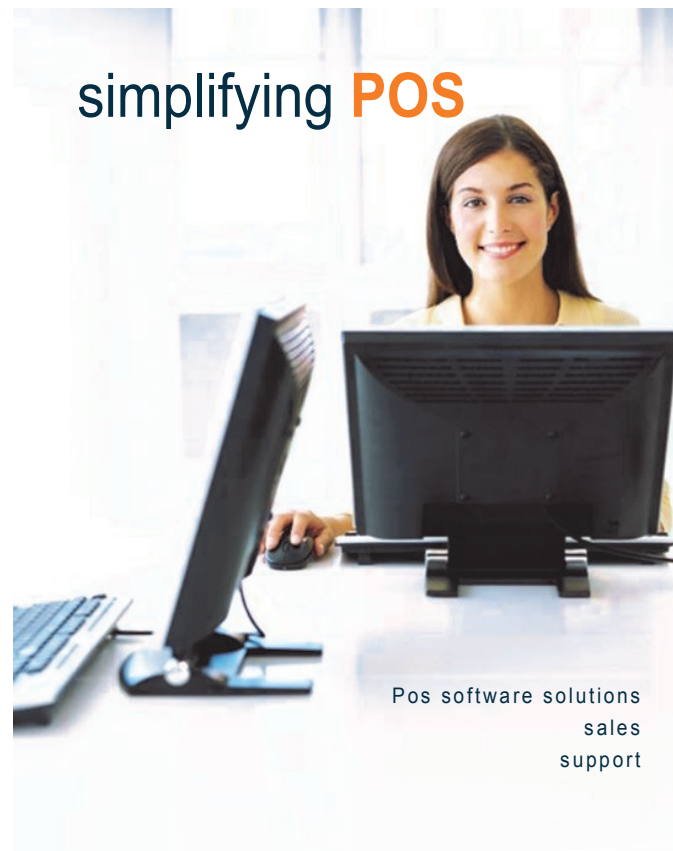

Smart-Acc, a local software developer company which is working hand in hand with the company, develop the series of Smart BizSolutions (Smart BizSQL & Smart POS) products incorporating each industry's unique operational tasks, accounting, inventory, pos solutions, communication tools (SMS, fax, and email) and customer relation into a Total Solution Software. These software products would further enhance the company's direction into the software application business.

With different IT expertise, we believe that we will provide a greater Simplicity idea and solutions to our clients in designing and maintaining their Technology infrastructure.

Ideas of Smart-Acc - Plug & Deploy Technology at work for you

To custom made your own software can be risky & costly, so our R&D work hard & creatively; providing you with Pre-package Software. With wide range to meet business needs. The Smart software series are designed to accommodate the whole spectrum of retailers, from large chains with multi-company, multi-department, and multi-register operations, to single stores working on single-user PC's. Smart-Acc team & channel partners, whose passions to provide services solutions to retailers' needs, also train the industry & implement system deployment.

With strong dedication to retail customers, this longevity is a key issue overlooked when retailers are choosing a software vendor. Our investment in our software research and development has been substantial. Retailers can rest assured that we will stand by our clients and continue to support our product. Our technology is interestingly simple & speedy > real time, online auto data sync & transfer, integrated modules, good friendly features etc. It is the ideal solution for expanding retail stores with locality support.

Simple retail solutions for global expansion

As we are offering solutions as below:-

- POINT OF SALES SOLUTIONS
